FOR THE COMPLETE HORSE

• Platinum Skin & Allergy

Start with a Solid Foundation

Platinum Performance® Equine contains ingredients that naturally support skin and coat health, including omega-3 fatty acids, trace minerals, vitamins, amino acids and antioxidants which are beneficial for maintaining and supporting skin health and can help with response to common allergens.

Show Safe

Platinum Skin & Allergy

Helps Maintain Normal Histamine Levels

Platinum Skin & Allergy is a potent formula that may be helpful in horses with seasonal allergies. Allergies can appear both in the skin as well as the respiratory airways in horses generally from exposure to allergens like mold, spores and insect bites. Platinum Skin & Allergy formula works by helping to maintain a healthy immune system and providing ingredients like quercetin, a naturally-occurring antioxidant, to maintain healthy histamine levels.

Recommendations for use Administer 1 heaping teaspoon (3,200mg) twice daily. Serving based on the average horse weight of 1000 lbs.

Ingredients Algal Omega-3 Docosahexanoic Acid (DHA), Quercetin, Purified Thymus Protein Complex [bovine] (Thymic Protein and Zinc Gluconate). Inactive ingredients: Non-Viable Marine Algae, Contains 2% or less: Sunflower Lecithin, Mono- and Diglycerides, Rosemary Extract and Citric Acid (to maintain freshness).

Size

Size	Servings
.25 lb	35
.5 lb	70
1 lb	141
2 lbs	283

Available in **Platinum PAK®**

Active ingredients per scoop (3,200mg)

Algal Omega-3 Docosahexanoic Acid (DHA)	510 mg
Quercetin	105 mg
Purified Thymus Protein Complex [Bovine] (Thymic Protein and Zinc Gluconate)	780 mcg

Maintaining a Healthy Skin & Coat

Platinum Performance® Equine

Supports healthy skin, and may be helpful during exposure to common allergens.

Advanced Allergy Support

Platinum Skin & Allergy

Advanced allergy relief during times of seasonal allergy outbreaks.

SCIENCE BEHIND THE SUPPLEMENTS

Allergy Relief: Omega-3s vs. Omega-6s

There is a correlation between the ratio of omega-3 and omega-6 fats that your horse consumes and his ability to respond to an allergen. Omega-3 fatty acids can help during allergic reaction. Omega-6 fatty acids, on the other hand, can exacerbate the inflammatory response. Platinum Performance® Equine is rich in omega-3s, vitamins, minerals and antioxidants that can help support a healthy coat as well as a healthy horse.

A study conducted at UC Davis showed that supplementation with Platinum Performance® Equine led to a dramatic improvement in supporting normal healthy skin condition in horses exposed to several common allergens. For advanced cases, thymus extract, quercetin and DHA, a form of omega-3 fatty acids, as found in Platinum Skin & Allergy formula, are supportive during outbreaks.
